

Education On Target

by Supt. Niemann

Commissioner's Review & Comment to be Discussed

At its regular school board meeting in June, the Ashby School board will be discussing the positive "Review and Comment" report received from the Commissioner of the Minnesota Department of Education in regards to its proposed building project. The public is encouraged to attend this meeting to get information on the upcoming election for the building project. The meeting will be held at **6:30 pm on Tuesday, July 13th** in the school media center. Supplementary information regarding the review and comment will be available for examination by the public during the meeting.

Weight Room Upgrade

One of the smaller pieces of Ashby Public School's proposed building project is to expand the size of the weightroom and upgrade some of its equipment. Ashby physical education instructor and coach, Peter Nelson, notes the room is very crowded when classes of 20 or more students use the facility which can also lead to safety issues. Similarly, summer weight lifting coach Kevin Fick has limited the number of participants he accepts into the summer program at any one time due to space constraints. Finally, the quality and scope of weightlifting equipment is constantly changing so new and more effective equipment is regularly being added to improve the student experience in this valuable physical education component.
